

2019-16
LAPEER COUNTY ROAD COMMISSION
ANNUAL BID
PRECAST & PRE-STRESSED CONCRETE SECTIONS FOR CULVERTS & BRIDGES

SPECIFICATIONS:

PROGRESS SCHEDULE

The successful bidder must supply and deliver the beams and panels to the job site F.O.B.

SLINGS

The successful bidder will be required to supply the Road Commission or its contractor with slings for their use in handling the beams. These slings will be returned when the beams have been placed.

DESIGN

The successful bidder must submit plans of section design and certify that the sections meet current Michigan Department of Transportation Standard Specifications as well as current Michigan Department of Transportation Supplements. Specifications as amended. A professional engineer (Michigan) must seal plans.

LOADING

HS-20, state thickness and minimum and maximum length available.

ANGLE OF CROSSING

90 degrees as standard, state changes in unit price for other angles if it applies.

PROVISION FOR GUARD RAIL

Fascia beams will be cast so as to provide for a suitable guard rail at current standard post spacing for bridge railing to be erected by others; details of fascia and interior beams or sections will be submitted by the successful bidder.

The successful bidder shall submit to the Road Commission a certification from the supplier that all components meet the applicable specifications. The Road Commission reserves the right to provide inspection and testing of all components.

Please submit a typical plan and section view of your product line for the loadings indicated showing details of interior and fascia beams, steel layout, anchorage, guard rail placement and abutment panels.

Unit cost to be per square foot of section provided. Bidders shall indicate the method of measurement upon which the unit cost is based.

F.O.B. job site in Lapeer County.
